DANIELS SMUŁKO

C++ GAME PROGRAMMER

About Me

C++ game, graphics and engine programmer with PC and PS5 experience. Currently at Bohemia Interactive, working on 3D octahedral impostors (R&D). Shipped one title on Steam. Experienced across Unreal, Unity, and custom engine environments.

Work experience

Feb 2026 - present

Junior Render programmer

(Internship) Bohemia Interactive

- Researching and developing 3D Octahedral Imposter feature

Aug 2025 - Jan 2026

XR Programmer

(Internship) Cradle / R&D lab of Breda University

- Optimized performance through draw call batching
- Designed artist-friendly model creation pipeline with custom shader
- Extended multi-user layer synchronization using Unity Netcode

School projects

Nov 2024 - June 2025

Gameplay & Tools Programmer

(Team) Katharsi - puzzle game published on Steam

- Developed C++ Unreal plugin for slime mold generation and editing
- Implemented light beam mechanic with mirror reflection and sensor interaction
- Overhauled lighting system; replaced Lumen to double rendering performance

May 2024 - July 2024

Gameplay Programmer / Technical Support

(Team) River Tale - game on Virtual Production stage

- Configured Vive tracking for physical custom controllers
- Set up Jenkins CI and Perforce source control
- Contributed to ship controls and physics

Feb 2024 - Apr 2024

Engine / Graphics Programmer

(Team) Custom cross-platform game engine - PC / PS5

- Implemented variance shadow mapping for all light types on both platforms
- Contributed to Blender level editor plugin
